Transitions Style Mirrors (XTRActive gray base)	Poly	Silver Shadow		Gold
	1.67	Pink	Red	Blue

FOOTNOTES

- ¹ With frame, send a copy of this form and place a green Signetek address label on your package.
- ² Must include a pattern with drill/notch finished jobs.
- ³ For optimal customization, provide point-of-wear measurements for: KODAK Unique HD/ Unique DRO HD Lenses; Crossbows Custom V and SV designs.
- ⁴ Tinting available on clear CR-39, poly and 1.67 lenses only. Tinting not available on photochromic, polarized, Total Blue or UVBlue Lenses.
- ** Total Blue Lenses include a special AR coating that combined with specific lenses filter 80% of harmful high-energy visible (HEV) blue light. Ask for details.
- *** UVBlue uses a blue cut lens blank that filters 20% of HEV blue light and block 100% UV. Good entry level option that can add Crizal/Kodak AR coatings.

SPECIAL INSTRUCTIONS:
